👤 PROFILE

Full-Stack Web Developer with experience building scalable, high-performance web and e-commerce applications using React, Next.js, Node.js, MongoDB, and PostgreSQL. Skilled in developing end-to-end solutions across frontend, backend, REST APIs, and deployment, with hands-on experience in WordPress and Shopify development, including plugin customization (PHP) and payment integrations.

🎓 EDUCATION

MSA University 🔗 B.Sc. Software Engineering	2019 – 2023 6 October City, Egypt
Greenwich University 🔗 B.Sc. Software Engineering	2019 – 2023 London, England

💼 PROFESSIONAL EXPERIENCE

Arab Security Group Full Stack Developer	Jun 2024 – Present Nasr City, Cairo
- Built and deployed scalable web and e-commerce applications using Next.js, React, Node.js, and PostgreSQL, improving system performance and user experience. - Built and customized WordPress and Shopify websites from scratch, including theme development, plugin customization (PHP), and payment integrations, enabling online sales and improving business operations. - Developed full-stack features across frontend, backend, REST APIs, and admin dashboards, enhancing system functionality and usability. - Managed production environments, including VPS setup, deployments, domains, and email configuration, ensuring system reliability and high availability.	
Elmaady Solutions Full Stack Developer	Nov 2023 – Jan 2024 Mohandesen, Giza
- Contributed to developing full-stack web applications using modern JavaScript frameworks, including responsive user interfaces and backend APIs. - Collaborated with the development team on feature implementation within Agile workflows, improving development efficiency and delivery speed.	
Information Technology Institute (ITI) Full Stack Web Intern	Feb 2023 – Mar 2023 Smart Village, Giza
- Developed responsive web applications using React.js, applying modern UI/UX practices. - Built RESTful APIs and integrated databases using Node.js and MongoDB, enabling efficient data handling. - Gained hands-on experience in state management, secure coding, and Agile development practices through real-world projects.	

🔗 PROJECTS

Production Healthcare Management System 🔗 Full Stack (Next.js + Express + MongoDB)	May 2025 – Dec 2025
- Developed a healthcare management system using Next.js, Node.js, Express, and MongoDB, supporting multiple therapeutic programs and user roles. - Implemented role-based access control (RBAC), secure authentication (JWT), and audit logging to ensure data security and access management. - Engineered a document processing workflow using Syncfusion DocumentEditor, Mammoth.js, and Puppeteer for DOCX parsing and PDF generation.	

- Developed appointment scheduling, multi-program enrollment, and integrated multi-method payment processing.

- Implemented real-time data synchronization using WebSockets (Socket.io) and deployed the system supporting 50+ concurrent users with 99.9% uptime.

File Upload and Analysis System

Full-Stack Project

Mar 2025

- Built a full-stack application using Next.js (frontend) and NestJS (backend) with PostgreSQL and Prisma ORM, improving data management efficiency.

- Implemented asynchronous file processing using Redis, Bull queues, and WebSockets, enabling scalable OCR and PDF parsing workflows.

- Designed a responsive user interface with React and Tailwind CSS, including drag-and-drop file upload functionality.

- Applied secure authentication and role-based access control (RBAC) using JWT for user management.

ASG Smart E-commerce Website

Full-Stack Project

Aug 2024

- Built a full-stack e-commerce platform using Next.js, React, Node.js, and PostgreSQL, supporting online transactions and scalable architecture.

- Integrated Paymob payment gateway to support multiple payment methods and secure transaction processing.

- Implemented secure authentication and session management using JWT and cookies, ensuring application security.

- Created an admin dashboard for managing products, orders, and user analytics, improving operational efficiency.

Arab Security Distribution Website

Full-Stack Project

Jun 2024

- Built a responsive web application using Next.js, React, and Node.js, ensuring cross-device compatibility and optimized performance.

- Developed custom RESTful APIs for dynamic content management and seamless frontend-backend communication.

- Created a Lucky Draw system with automated winner selection logic, improving user engagement and interaction.

- Designed and optimized user experience (UX) with a modern, intuitive interface to enhance usability and accessibility.

Egyptian Museum AR Companion App

Graduation Project "Grade: A"

Sep 2022 – Jun 2023

- Built an augmented reality (AR) mobile application using Flutter, Unity, and Vuforia SDK, delivering interactive museum experiences.

- Developed indoor navigation and object detection features using Unity, enabling users to locate exhibits and access contextual information.

- Integrated Firebase for cloud storage and real-time data synchronization, supporting dynamic content updates and enhancing user experience.

SKILLS

Frontend: React.js | Next.js | HTML | CSS | Tailwind

Backend: Node.js | Express | NestJS | PHP

Database Management: Oracle | MySQL | MongoDB | PostgreSQL | SQLite

Tools & Technologies: Git | REST APIs | WebSockets | Redis | VPS | Linux | Docker

Concepts: Object-Oriented Programming (OOP) | Authentication & Authorization | Web Security | API Integration

CMS & E-commerce: WordPress (Custom Plugins) | Shopify (Custom Development)

SOFT SKILLS: Problem Solving | Ownership & Accountability | Communication (Technical & Business) | System Design Thinking | Team Collaboration | Time Management | Attention to Detail

LANGUAGES

Arabic — Native • **English** — Full working proficiency
